

Long Hand Impulse SEALERS

FEATURES

- Longer seal lengths for specialized sealing needs
- No warm-up time
- Heavy duty construction
- Available with cutter unit

W-Series long hand sealers offer a longer sealing length and are ivory in color. The sealers are steel constructed for quality and durability. Round wires can be ordered for cut and seal applications, but the sealers accompanied with a cutter are also available. Blade cuts approximately $\frac{3}{4}$ " from the seal. Machine film rollers are also available

Manufacturer's kit includes 3 elements and 1 blade (if cutter unit is ordered).

Easy to Operate:

Simply set the timer, insert the bag between the sealing bar and press down on the seal bar. For the best quality seal, hold the seal bar down a couple of seconds after the light goes off before releasing. For sealers with cutter, slide across the bag while holding the seal bar down to cut the bag.

film roller

- all metal construction
- available in 20", 26", 31", and 42"
- heavy duty
- available w/ or w/o out film separator and film perforator
